# **General Specifications**

### **Electric support**

Alumina ceramic metalized with EBG ALTOX film on the bottom for improved heat transfer and optimum discharge

### **Encapsulation**

Resin-filled epoxy casing with large creeping distance to mass, large air distance between the terminals and high insulation resistance (CTI 600)

### **Resistance Element**

Special design for low inductance and capacitance values. The element employs our special METOXFILM, which demonstrates stability while covering high wattage and pulse loading

# Housing

Housings are made without color additives. The color definition is natural and can vary in different pigmentation

## Contacts

Easy load connection with M4 and M5 screws

(Inch thread terminals on request)

- Connector height available from 25 to 42 mm
- Various sleeves for increasing creeping distance up to 85 mm or potted cable connections are available on request
- Contacts standard M5 (M4 on special request - connection screw thread max. 7 mm

Derating (thermal resis.) UXC-800: 11.43 W/K (0.09K/W) Power rating: 800 W at 85°C bottom case temperature\* Please ask for detailed mounting procedure!

\* This value is only applicable when using a thermal conduction to the heat sink Rth-cs<0.025 K/W. This value can be obtained by using a thermal transfer compound with a heat conductivity of at least 1 W/mK. The flatness of the cooling plate must be better than 0.05 mm overall. Surface roughness should not exceed 6.4 µm.
